Agathe LACOMBE , meetMED II Project Manager

The Concerted Action for Building from meetMED II project perspective

- **Involved target countries:** Algeria, Egypt, Jordan, Libya, Lebanon, Morocco, Palestine, Tunisia
- **Different National Energy Strategies and targets in energy consumptions and renewable energy**
- **Same Trend:** The Building sector as one of the largest energy-consuming sectors, responsible from 20% up to 35% of energy consumption, not to forget the CO2 emissions.
+ Rapid demographic growth and urbanization

29 March 2022

How to harmonize strategies and how to accelerate the implementation of measures?

Main challenges:

Concerted Actions goals: Acts like a “consultation forum”, to bring together experts from different energy and buildings sectors, to share information and good practices on improving energy management, EE, the use of RE, etc. For greater dissemination of virtuous and effective measures and tools.

Concerted Actions meetMED II style: Share of experience between the North Shore of the Mediterranean, and the South Shore, to build on the successful approaches of others, because partners can learn from each other.
