NDC PARTNERSHIP

 **MEETMED WEEK**
09 - 11 MAY 2023
MARRAKESH - MOROCCO

A GLOBAL COALITION FOR COLLECTIVE ACTION

The NDC Partnership brings together developed and developing countries and institutions to create and deliver on ambitious climate action to help achieve the Paris Agreement and Sustainable Development Goals.

SUPPORT UNIT

The Partnership is facilitated by a secretariat known as "The Support Unit," a diverse team based primarily in Washington DC and Bonn Germany and co-hosted by the UNFCCC, UNOPS and WRI.

The Support Unit serves our 200+ members, advancing member's stated needs as a neutral broker.

Scoping mission
Cuba

HOW WE DELIVER

We have dedicated strategies in place to accelerate action in response to demand.

OUR DELIVERY MECHANISMS

Country engagement

Working with the whole-of-government to prioritize and catalyze support for country requests to implement and enhance NDCs.

Knowledge & learning

Facilitating the exchange of best practices, lessons learned, and key resources to scale up climate action.

Access to Finance

Enabling a shared understanding of the challenges at both demand and supply sides of climate finance to mobilize access for implementation.

COUNTRY ENGAGEMENT

MAINSTREAMING CLIMATE

Designing flexible, country-driven processes for countries to systematically identify priority needs and mobilize member resources to address them.

Supporting the creation and maintenance of frameworks for cooperation and implementation.

Collaborating to deploying technical and financial support

Countries may opt into and adopt existing best practices and models.

COUNTRY ENGAGEMENT

MOBILIZING SUPPORT

We develop a range of instruments and broadcast member needs.

The Support Unit then circulates them to members, presents them nationally and internationally to increase visibility and the rate of response.

RESPONDING TO COUNTRIES STATED NEEDS

Policy, Strategy & Legislation

Policy and legal framework development or update | Mainstreaming climate into national, subnational and sectoral planning processes | Climate Plans and Strategies, including Long Term Strategies (LTS) | Analytical tools for evidence-based policy on climate and development impacts | SDG alignment | Sectoral strategies and plans.

Budgeting & Investment

Climate-related Investment Plans | Budgeting and expenditure reviews | Mainstreaming climate into Public Financial Management (PFM) | Development of investment projects | Fiscal and macroeconomic policies | Climate funds.

Strengthening Institutional Capacity

Development and improvement of Monitoring, Reporting and Verification (MRV) systems | Data collection and management | Development and implementation of information systems.

ACTING TOGETHER, ACHIEVING MORE

Partners align existing and/or mobilizing new resources to support country needs.

OUR DELIVERY MECHANISMS

Country engagement

Working with the whole-of-government to prioritize and catalyze support for country requests to implement and enhance NDCs.

Knowledge & learning

Facilitating the exchange of best practices, lessons learned, and key resources to scale up climate action.

Access to Finance

Enabling a shared understanding of the challenges at both demand and supply sides of climate finance to mobilize access for implementation.

How We Deliver

KNOWLEDGE & LEARNING

Knowledge & Learning activities facilitate the exchange of relevant trends, lessons learned, and other resources to:

> Implement NDCs

Increase countries' access to knowledge to build necessary for NDC planning and implementation.

> Program and Deploy technical and financial support

Enable implementing and development partners to better deploy technical and financial support in alignment with countries' needs and priorities.

OUR DELIVERY MECHANISMS

Country engagement

Working with the whole-of-government to prioritize and catalyze support for country requests to implement and enhance NDCs.

Knowledge & learning

Facilitating the exchange of best practices, lessons learned, and key resources to scale up climate action.

Access to Finance

Enabling a shared understanding of the challenges at both demand and supply sides of climate finance to mobilize access for implementation.

ACCESS TO FINANCE

COUNTRIES FACE PERSISTENT CHALLENGES

Access to finance is critical for ambitious mitigation and adaptation action. Yet, significant challenges exist in matching climate finance to impactful projects. The challenges can be seen from different perspectives.

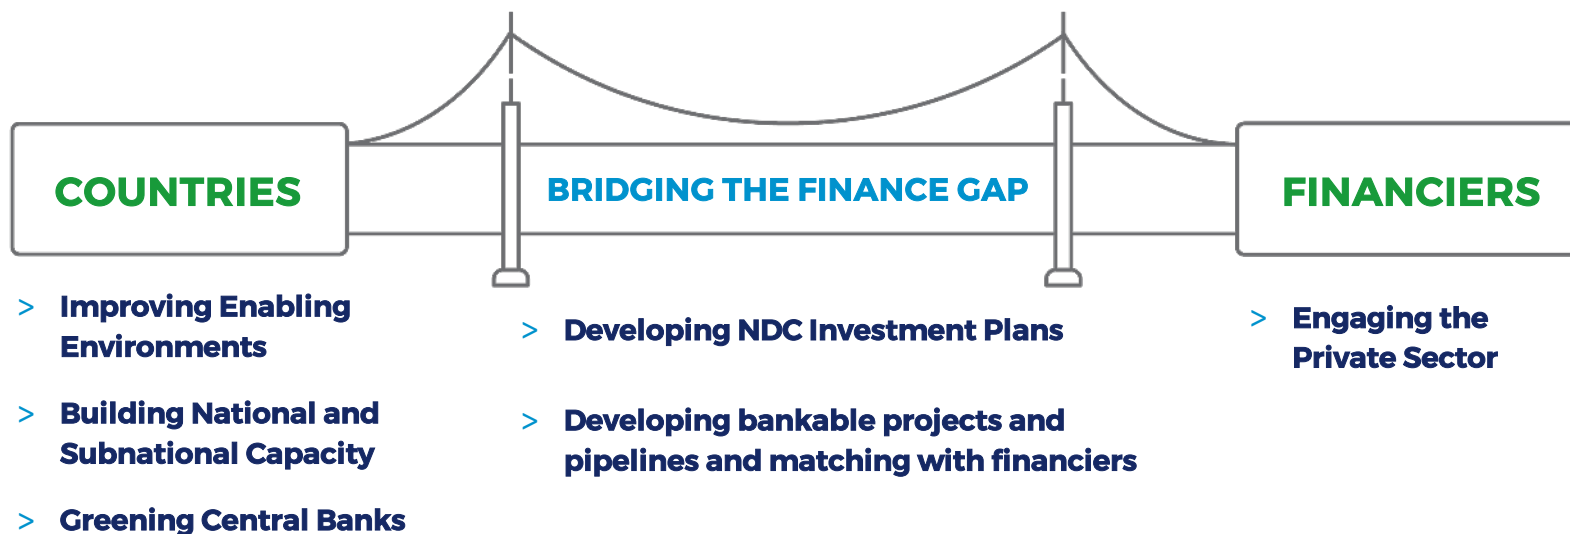

The State of Climate Action 2021 estimates

Global climate finance needs of USD 5 trillion annually by 2030

- > **Finance is available, it just isn't flowing where needed**
 - Limited coordination among financiers
 - Limited insight into countries' NDC investment needs and projects, and understanding of country contexts, risks, and opportunities
 - Requirements and processes limit swift action and matchmaking

- > **Finance is not accessible at speed or scale**
 - Need for coordination across stakeholders
 - Limited capacity to make NDCs investment-ready
 - Limited insight into funding requirements and innovative finance mechanisms to attract diverse finance sources

MOBILIZING ACCESS TO CLIMATE FINANCE

CROSS-CUTTING

Developing NDC Investment Plans / Aligning processes, streamlining and catalyzing funding /
Cross-cutting learning / Capacity Development

ACCESS TO FINANCE

FINANCE-RELATED SUPPORT REQUESTS

85% of developing country members have submitted at least one finance-related request for support

Examples of support needs include:

- > **Integrating NDCs into national planning, budgets, and revenue**
- > **Developing strong enabling environments**
- > **Developing climate finance strategies and investment plans**
- > **Developing bankable projects and pipelines**
- > **Project and program financing and resource mobilization**
- > **Private sector engagement**

DEEP DIVE

GREENING CENTRAL BANKS INITIATIVE

Objectives:

Ensure central banks in developing countries have the knowledge, institutional capacity, processes and systems to adopt a precautionary approach to climate risks, and safeguard and promote green investment.

- > **Developing Roadmaps to green the financial sector**
- > **Strengthening climate risk frameworks and stress testing**
- > **Adopting taxonomy and disclosure processes**
- > **Promoting sustainable investments**
- > **Strengthening coordination and whole-of-government approaches to climate action**

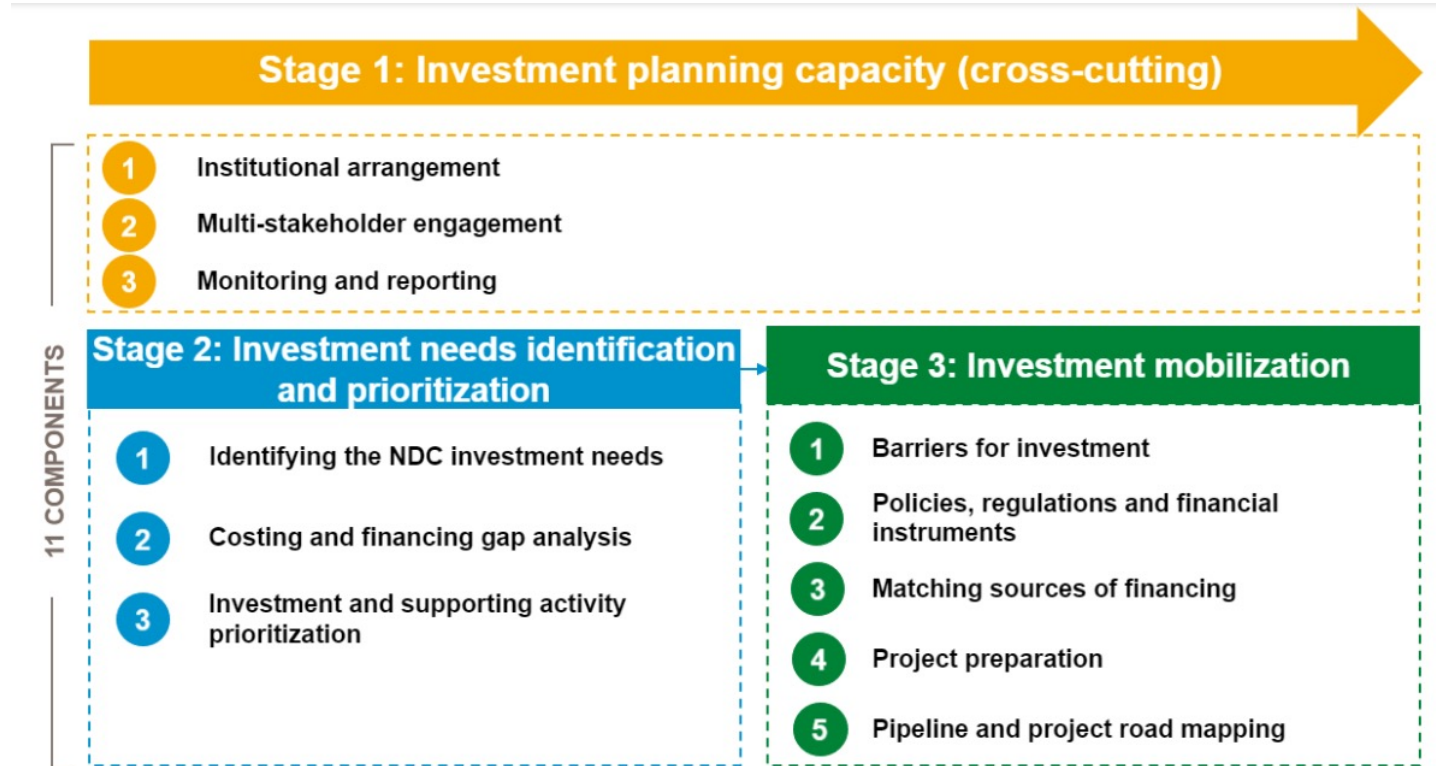

DEEP DIVE

NDC INVESTMENT PLANNING GUIDANCE

Shared language and a common framework around investment planning supports countries to clearly and effectively share their investment needs and allows partners to better coordinate delivery of support for NDC investment planning.

- > **Programmatic approach**
- > **Dynamic and iterative**
- > **Provides a step-by-step sequence with specific outputs for countries to tailor their needs**

NDC INVESTMENT PLANNING GUIDANCE

DEEP DIVE

KEY TAKEAWAYS

The Partnership supports countries in moving from strategic projects toward more programmatic approaches that lead to transformational change in line with climate goals.

- > **Energy access and transition is the priority sector for climate action, with the most sector-specific requests under the NDC Partnership**
- > **NDC Partnership supports frameworks for climate action, including renewable energy at the national level**
- > **TA needs for MRV/data to demonstrate the additionality of RE/EE measures, legislation and feasibility, and project preparation**
- > **National, Regional and International actors can quickly identify country needs and entry points to provide support**
- > **Regional organizations, like RCREEE, play a critical role in fostering an environment suitable for climate finance**
- > **In line with the Partnership's finance strategy, work across sectors and national authorities to access climate finance**
- > **LT-LEDS are a useful tool for building a coherent approach to reducing emissions and just transition**
