

EFFICIENT BUILDINGS

Peter SCHILKEN, Project Manager, Energy Cities

Bernard MASSABO, Project Director, Euromed Cities Network

**Launching meetMED II – Regional
cooperation for an energy efficient future**

Online workshop - April 7, 2021

Funded by the
European Union

The Efficient Buildings Community initiative

- Interreg MED horizontal project.
- Partnership: Euromed Cities Network/City of Nice (Lead Partners), Energy Cities, IREC, CMCC, University of Patras, CRES, ENEA, ADENE.
- Efficient Buildings is a strategic coordination, communication and capitalization project:
 - Promoting the transfer and replication of decision-making tools with regards to energy efficiency in public buildings
 - Set up by Interreg MED Modular Projects.
 - Targeting in particular local and regional authorities and energy agencies throughout the Mediterranean basin but with a focus on the EU and IPA countries.

Possible synergies with meetMED II

- Development of Efficient Buildings' North-South City Partnerships pilot action, in order to promote a coherent action with national energy agencies.
- Trainings for local and regional authorities (through thematic Capacity Building Workshops, national Living Labs,...).
- Exchanges, transfer and joint promotion of decision-making tools set up by Interreg MED Modular Projects (and others), which are mature in terms of replicability.
- Capitalisation activities such as policy debates, joint webinars, EB digital days in June 2021
